DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-16 and 24-32, drawn to a nucleic acid fragment comprising a COMT II promoter including SEQ ID NO: 1 or fragments thereof, a chimeric gene comprising said promoter operably linked to a coding sequence and a 3' regulatory sequence, an expression vector comprising said chimeric gene, and a method for transforming plant cells with said chimeric gene and plant/grain comprising said transformed cells.

Group II, claim(s) 17-32, drawn to a chimeric gene comprising a coding sequence for an elicitor, including SEQ ID NO: 13 and 14, operably linked to a promoter, expression vector comprising said chimeric gene, a method for transforming plant cells with said chimeric gene, and plants and grains comprising said transformed cells.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of Group I is taught in the prior art, as evidenced by Capellades et al (Plant Molecular Biology, vol 31, pp. 307-322, 1996, Applicant's IDS). Capellades teaches maize 0-methyltransferase gene promoter operably linked with GUS in a DNA construct and a method of transforming maize and tobacco plants with said construct (page 309 columns 1-2).

Hence, there is no special technical feature that links the chimeric gene of Group I with the chimeric gene of Group II. The chimeric gene of Group I requires COMT promoter and any coding sequence, while the chimeric gene of Group II requires the coding sequence for a fungal elicitor with any promoter. Therefore, inventions of Groups I and II are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Papers related to this application may be submitted to Technology Sector 1 by facsimile transmission. Papers should be faxed to Crystal Mall 1, Art Unit 1638, using fax number (703) 308-4242.
